

Double Decker Bus Template

Buses are still an important part of our public travel! To get from Bat & Ball Station into Sevenoaks Town and beyond, hoping on a bus is the best way forward. At our Heritage Open Day event in September, we occasionally have a selection of vintage buses, ready to take passengers where needed. Have a go at making one!

(Base of the bus)

Step by Step

Cut around the outside of the suitcase

Cut along these red dash lines

Fold along these grey dash lines

1. Cut around the outside of your bus
There are some areas with a yellow dotted line which needs cutting

2. Fold along the grey dotted lines. It's easier to fold with the bus facing us, and then reverse fold then with the bus facing down. Use a ruler to help keep the folds straight and smooth.

3. Begin to glue- start with the back end of the bus.

4. The back step of the bus goes inward.

5. The inside window where the driver looks out of also goes inward

6. To finish, put the base of the bus to hold it all together and make a rectangle shape!
All done!
